Preparation of heterologous hydrogenase in blue-green algae for production of hydrogen and is environmentally friendly Example 4; Fig 10; 12pp; Japanese.

```
A method has been developed for the preparation of hydrogenase in which a blue-green alga introduced by a recombinant vector containing a cheterologous hydrogenase gene is cultured in a medium to form and accumulate hydrogenase in the microbe body. Also claimed are: (1) a blue-green alga introduced by a recombinant vector containing a gene having a Shine-Dalgarno sequence consisting of AAGGAA upstream of the hydrogenase structural gene derived from a Clostridium genus microbe; (2) a method for the production of hydrogen by culturing the above blue-green alga under light irradiation; (3) a method for the production of hydrogen by reacting the above blue-green alga anaerobically and then under light irradiation; (4) a method for the production of thydrogen by reacting the above blue-green alga with an electron receptor; and (5) a method for the production of hydrogen by reacting the above blue-green alga with an electron receptor. The method is mild to environment. The present sequence represents a Clostridium pasteurianum hydrogenase mucleotide sequence from an example from the present invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Matches 359;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           á
                                                                                            The specification describes antisense oligonucleotides (AAX52869-X55271) CC directed against at least 2 mRNAs selected from target genes, coding and con-coding regions of RNAs corresponding to target genes, gene coding regions, genemic flanking regions, intron-exon borders, the intrinction codons, genemic flanking regions, intron-exon borders, the creations and all segments of RNAs encoding proteins associated with one coding and anon-coding regions and all segments of RNAs encoding proteins associated with one compared to the conditions or mixtures. The antisense oligonucleotides (specifically AAX5510-71) can be used for the coding only be derived from sequences AAX5510-71) can be used for the coding only conditions are those associated with impaired respiration and conditions are those associated with impaired respiration and conditions are those associated with impaired respiration, including lung diseases, pulmonary vasoconstriction, codinflammation, including lung diseases, pulmonary vasoconstriction, coding number of conditions are those associated with impaired respiration and conditions are those associated with impaired respiration and conditions are those associated with impaired respiration and conditions.

CC inflammation, including lung diseases, pulmonary vasoconstriction, caphysema, chronic codes conditions of the pulmonary disease (colon cancer such as luxhemias, colon cancer, breast cancer, lung cancer, cor panceratic cancer, hepatocellular carcinoma, kidney cancer, melanoma, bepatic metastasize, as well as all types of cancers which may metastasize to the lungs including breast and prograte cancer.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Antisense oligonucleotide; multiple target; antisense treatment; impaired respiration; inflammation; lung disease; pulmonary vasoconstriction; inflammation; allergic rhinitis; acute asthma; allergy; asthma; impeded respiration; respiratory distress syndrome; pain; cystic fibrosi; pulmonary hypertension; pulmonary vasoconstriction; emphysema; chronic obstructive pulmonary disease; leukemia; lymphoma; carcinoma; colon cancer; breast cancer; lung cancer; pancreatic cancer;
